What We Do

SightSpan understands that information is critical for sustaining and supporting your company growth as well as maintaining a competitive edge. As your business increases and the channels of information that capture and distribute information grow in complexity, more focus is needed in identifying the key areas requiring structure and control of information processing and delivery. In addition, insight into your end-to-end information flows is critical for making strategic business decisions. The SightSpan team is dedicated and ready to assist you in executing on your information management needs.

Our Information Management discipline at SightSpan is focused on partnering with you and your teams to create world class innovative solutions that align with your specific needs of creating, gathering and managing business information. SightSpan is focused on partnering with your company to drive out the right solutions that meet even your most complex information needs.

SightSpan long term goal is to build a partnering relationship with our clients, allowing for document and program consistency with on-demand team expansion capabilities.

Problem Statement

Organizations are faced with global challenges both on an industry and enterprise level:

- Inconsistent business information used across enterprise
- Complex business information channels
- Unknown input and distribution points: current state information risk analysis
- Business impacts caused by changes to information channels
- Lack of standardization increasing risk exposure for businesses
- Undefined governance model for information management oversight
- Cost of maintaining business information is increasing
- Need for independent testing requirements

How We Help

SightSpan partners with you to assist in the management of running effective Information Management projects or programs that conform to the requirements of your business. SightSpan's design and improvement strategies focus on efficient risk reduction based on your specific business needs.

Enhancing your information management capabilities:

- ✓ Provide experts in business information sectors
- ✓ Enhance existing information processes
- ✓ Establish or design new information flows that meet needs
- ✓ Perform risk assessments of designated information flows
- ✓ Design and incorporate risk-based methodology to decision information flows
- ✓ Program requirements documentation
- ✓ Vendor comparison and analysis
- ✓ Perform independent testing and customized audits
- ✓ Support on-going program evaluation and consultation services
