What We Do

Our Quality Assurance discipline is focused on establishing and validating steps and methods of product production for reliability and repeatability in order to support the growth and targets of business. SightSpan Quality Assurance experts have years of experience working within many disciplines of product lifecycle methods, and apply practical solutions that fit within your individual business culture and objectives. Your business needs the focus on quality assurance in order to meet the goals and expectations of customers. Our quality assurance team will assist you in executing best practice results every time on every project.

Quality assurance is a mindset and a discipline that exists throughout all stages of product production. Whether your business handles defining or planning a project or building and deploying a product, you have a need for SightSpan quality assurance experts. We work with your team of subject matter experts to understand each case and offer controls that will enhance the end product outcome.

At SightSpan, we are committed to assisting your business meet success. Execution every time is the target in this environment, and our Quality Assurance team will get you there.

Problem Statement

Organizations are faced with global challenges both on an industry and enterprise level:

- Undefined methods for tracking project lifecycles
- Low customer satisfaction
- Changes to business policies and procedures make it difficult to manage and execute within timeframes and budget
- Products do not meet customer expectation
- Cost of doing business is increasing
- Need for a risk-based end to end program evaluation
- Lack of project and/or product control points

How We Help

SightSpan partners with you to assist in the management of running an effective Quality Assurance program that conforms to the requirements of your business. SightSpan's management strategies focus on business risk reduction based on specific business needs.

Enhancing your quality assurance management capabilities:

- ✓ Provide execution-based experts in quality assurance
- ✓ Evaluate existing methods using risk-based approach
- ✓ Align business goals to project portfolio
- ✓ Design and incorporate risk-based methodologies focused on quality control maintenance
- ✓ Quality Assurance documentation/Test Script Creation
- ✓ Provide training on quality assurance maintenance
- ✓ Perform independent testing and customized audits of quality assurance processes
- ✓ Support on-going quality assurance program evaluation and consultation services
