- *Quality Assurance -*

What We Do

Our Technology Portfolio Management discipline centers on the core of your technology investments and works with your technology team and your business team to execute the needed adjustments to technology necessary to meet the needs of your business today and in the future.

Often times, there is a conglomerate of different technologies that make up the infrastructure supporting business units. In addition, there is often legacy technology supporting critical processes. Both technology scenarios are not uncommon, and at SightSpan™ we see opportunities within each. The SightSpan™ Technology Portfolio Management team focuses on what the problem statement is of the business unit and using our risk-based approach, can map out the most cost effective and strategic course for the business to take.

At SightSpan™, we are committed to assisting your business and technology teams to meet success. Execution is the target in this environment, and our Technology Portfolio Management team will assist you with making decisions that count. Whether your business needs technology to support an increase in data volume, transaction processing, or throughput, or a new product or business platform, SightSpan™ can help you determine how to get to your end goal more effectively.

Problem Statement

Organizations are faced with global challenges both on an industry and enterprise level:

- Undefined business goals for technology portfolio alignment
- Low customer satisfaction
- Changes to business policies and procedures make it difficult to execute with current technology solutions
- Undefined governance model for technology portfolio management oversight
- Technology portfolio cost is increasing
- Need for a risk-based end to end program evaluation
- No roadmap aligning business goals to technology portfolio enhancements

How We Help

SightSpan™ partners with you to assist in the management of running an effective Technology Portfolio program that conforms to the requirements of your business. SightSpan's™ management strategies focus on efficient technology risk reduction based on your specific business needs.

Enhancing your technology portfolio management capabilities:

- ✓ Provide experts in technology portfolio management
- ✓ Evaluate existing technologies using risk-based approach
- ✓ Align business goals to technology portfolio
- ✓ Design and incorporate risk-based methodologies focused on technology portfolio maintenance
- ✓ Business requirements documentation/Use Case Creation
- ✓ Technology vendor comparison and analysis
- ✓ Perform independent testing and customized audits
- ✓ Support on-going technology program evaluation and consultation services
